

RELEASE NOTES

December 2019 | Mini- Release

Hub 2.0 Filter Members – Export Filtered Population

Export to CSV members that you have filtered. While in the Filter search result, you can see up to 20 members (selected randomly by the system), the export file will include details of all the filtered members. [Read more.](#)

SMS/E-mail Test

Check the content and the structure of your communication message before you send them to your members by using “Send Test” button:

Notes:

1. At this point, the option is available only for SMS and e-mail actions.
2. Test SMS can be sent only to a phone number that is related to the business’s country code. For example, for a business that set-up in the US (country code 1), it will possible to send test SMS only to a US mobile provider number.
3. Add your phone number and e-mail to you Hub user, so that the system can auto- populate it for you (Go to User Option drop down on the Hub header and select “My Hub Preferences”).

Member Profile – Indication for ‘Unregistered’ Members

A visual indication was added to the profile of a members who has “unregistered” status.

Accumulate a Dynamic Number of Points on External Event

3rd party systems that wish to maintain an “external” points accumulation, can now inject the points to Como using an external event. The number of points that will be added to the member will be based on the numeric parameters (points should be sent in cents).

Bugs

The following bug fixes will be released:

[CNP-17997](#) - One-time and its campaign do not appear in campaign center even when choose in filter archived campaigns and activities
