Layout Catalog - React app

This catalog shows the variety of layouts available for your app's home screen.

Widgets

These are the widgets you can add to your app's home screen.

Profile

Clearly display users and their relevant details. You can adjust the information shown here.

Welcome Message

Use this space to add images or customized messages to communicate with your users.
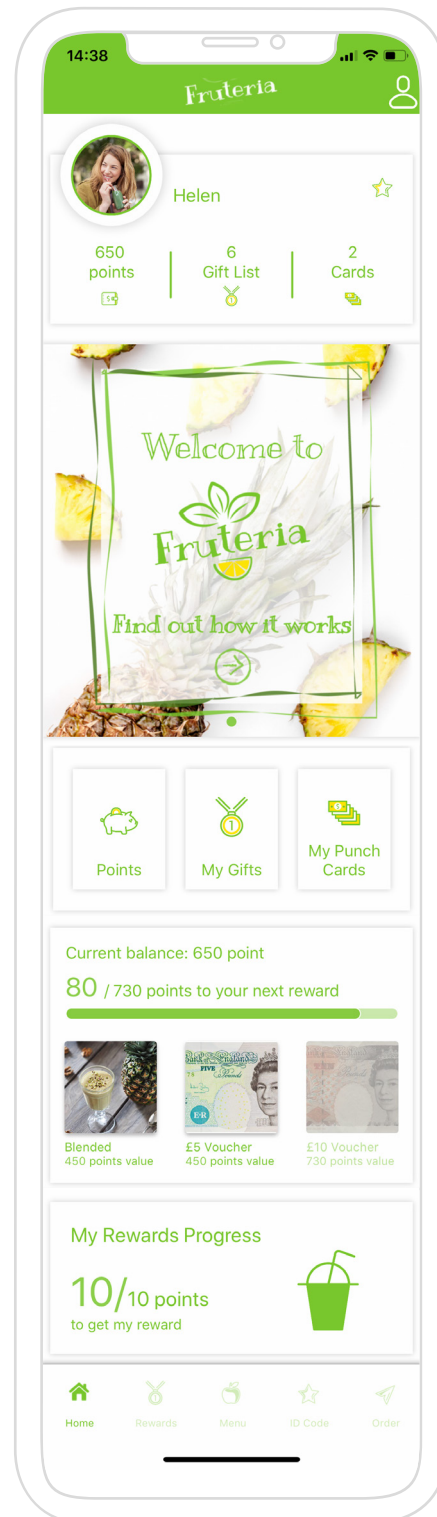

Tiles

Choose any button you want to show here, from 1 centered button to 3 buttons.

Point Shop

Showcase items which can be bought using points for your business.
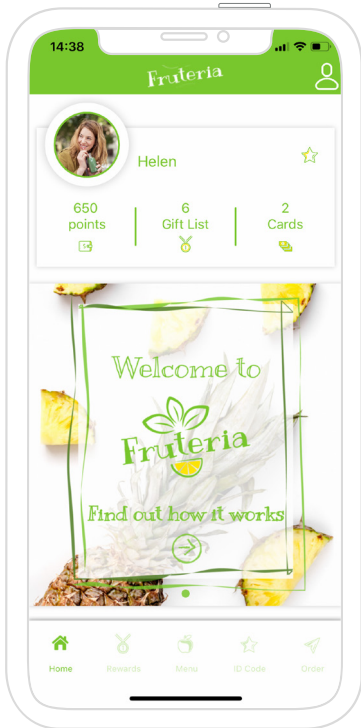

Auto-Redeem Points

Automatic redeem points instantly rewards users once they reach a certain amount.

Home Screen Layouts

Layout style 5

Layout style 6

Navigation

These are the navigation layouts you can use in your app.
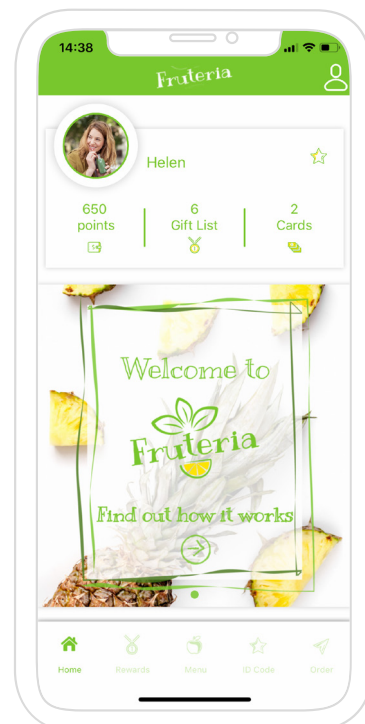

Side Menu

Side menu gives your app a clean look without it being overcrowded.
Choose between 2-7 functions to showcase in your menu including their icons and colors.

Bottom Bar

A clear and a straightforward navigation layout that displays all the functions to the user.
You can have between 3-5 functions in the bottom bar and decide the look of titles, colors, and icons.

* The app can have both navigation layouts at once.
